- 9:30 Session 4: Case studies and potential follow-ups
- 11:30 ROUND TABLE: Developing a European platform of Underground built heritage for supporting innovative projects in EU funding programs

Unioncamere
Campania

L'Europa alla portata della vostra impresa.

The workshop is the outcome of two EU proposals, which aim at establishing, implementing and exploiting a platform to share best practices for a sustainable use of the underground heritage.

With the scientific coordination of the Institute of Studies on Mediterranean Societies (ISSM-CNR), a mix of speakers from academic and business world, with multidisciplinary competencies, will present successful experiences, promote balanced and sustainable approaches for the conservation of the underground heritage, and realise the potential of underground space for development.

They will propose new functions, seen as evolution of the historical ones – with a particular attention to their divulgation – maintaining a conservative approach of their historical value as part of the European Cultural Heritage.

The workshop will have the role to reinforce the network and develop new EU proposals in Horizon 2020, INTERREG Europe, and COST programmes, attracting public bodies and private companies

A site visit of the “Galleria Borbonica” sponsored by:
